

Curling Club Prepares For Ice-Making

With the coming of colder weather, members of the Lacombe Curling Club are again looking up 'besoms and stanes' in readiness for a long season of curling. Preparations for ice-making were begun on November 1st, and the annual re-organization meeting will be held on Friday evening, November 8th in the Town Hall, to which everyone interested in curling is invited. The Club was composed of 14 rinks last year and wound up the season's sport with a local bonspiel of 25 rinks. The many new players entered in that 'spiel' will, no doubt wish to put in a full season this year. Open, mixed and local bonspiels are held during the winter every season, the ice always being kept in the best of condition and every facility provided for the comfort and entertainment of both visiting and local players. Last season's officers were: Pres., P. W. Pratt; 1st Vice-Pres., T. Wilkes; 2nd Vice-Pres., J. Lamont; Secretary, C. E. Todd.

The Churches

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe
Diocese of Calgary
Incumbent: The Rev. T. H. Chapman.
Licensed Lay Readers: Messrs. E. L. Jones, K. C. and A. T. Insko, Esq.
Organist: Mrs. L. D. Wright.

Friday, 7:30 p.m. Choir, Practice.
Nov. 10th, 2nd Sunday after Trinity
10:00 a.m. Sunday School.
11:00 a.m. The Bishop. Dedication and Holy Communion.

7:30 p.m. Harvest thanksgiving.
1. All interested members of the Church are requested to come and help to decorate it at 3 p.m. on Saturday. Please bring some sheaves of grain and other materials.
2. At 11:15 a.m. on Monday—Remembrance Day—there will be the usual short service of Commemoration at the Church immediately after the service at the Memorial Park.

3. Everybody is most cordially invited to attend the Special Services as announced in the foregoing.

ST. ANDREW'S UNITED CHURCH
Rev. R. B. Layton, B.A., D.D., Minister

SerVICES at 11 a.m. and 7:30 p.m. Sunday School at 11 a.m.
Morning subject—"The Shout of Victory."
Evening subject—"The Way of Peace."

At the request of the Lest-We-Forget Club an Armistice Service will be held in the evening, at which the Choir will give special music.

SerVICES at Lakeside on Sunday afternoon at 2 p.m.
The monthly meeting of the Board of Managers will be held on Tuesday evening.

ARMISTICE SERVICES

On Sunday evening, at the request of the Lest-We-Forget Club, a special service will be held in the United Church. The Choir will give appropriate music, consisting of a Solo "In Flanders Fields," by Mrs. Wilkes, and an Anthem, "I Heard the Voice of Jesus Say," by the Choir.

On Monday morning at 10:45 the usual service will be held in the Memorial Park. His worship, the Mayor, will preside. The members of the Lest-We-Forget Club, of the Legion, of the Town Council, and others will be present. The usual ceremony will be performed, followed by the two-minute's silence at eleven o'clock.

Successful Party to Raise Funds For Basketball Team

Approximately sixty guests attended the Lacombe High School party on Friday evening, which was put on to raise funds for the basketball team equipment for the High team. In addition to the dance which was enjoyed by all, a laughable pantomime comedy, "Gut-pie Special" was enacted by Tom Caruthers, Jack McCaugherty, Don Wilkes, Alvin Troll and George Marshall; a song skill by Betty Wilkes, Doll McDermott, Doris Danner, Clarence Perkins, Harry Wright and Don Wilkes, was very amusing; games and fortune telling booths were also aids to the entertainment which concluded by the basketball girls appearing in uniform and giving their cheer songs. Louise Todd gave a short speech on the activities of the team and their plans for the coming season. Music was provided by Mrs. H. Woody, Harry Wright, Margaret Watt and Mrs. Waters.

ROAD SIGNS ORDERED

RIMBEY—Municipal district of Blindman has ordered a dozen road signs to be placed at various points of danger along the roads and highways.

Lacombe Loses Oldtimer By Death of Mrs. Cannon

Word has been received from Almonte, Ont., of the death of Mrs. A. Cannon, a well-known and highly esteemed oldtimer of the Lacombe district.

The late Mrs. Cannon, who was 73 years of age, was born in Antwerp, New York. She came with her husband from Park City, Utah, in the early early days and homesteaded near Lacombe, on the farm now owned by Mr. Tom Alexander. Later the family moved to Almonte, Ont., for some years, but returned to Alberta and made their home on a farm north-west of Lacombe. They lived here until a few years ago, when Mr. and Mrs. Cannon again moved to Almonte where they have been residing on the old home farm.

Mrs. Cannon had been visiting relatives in Gouverneur, New York, when she took ill suddenly and was taken to hospital where she passed away on Saturday, Oct. 26. Her two daughters, Miss Jean Cannon and Mrs. William Brodersen, who had been visiting their parents, were with her mother in her last illness. She leaves to mourn her loss her husband and three daughters, Miss Jean Cannon of Vancouver, Miss Donna Cannon of Almonte, and Mrs. William Brodersen of Leduc, Alta. She also has two granddaughters, two sons and two sisters, all living in New York state, also survive her. Her only son, Gilbert Cannon, predeceased her in 1933. Much sympathy is being expressed in the community for the bereaved family.

The funeral services were held in Almonte, Ont., on Monday, Oct. 28th. Many beautiful flowers testified to the high regard in which the deceased was held in the community. One of the pall-bearers, Mr. Hugh Bowland, now a resident of Almonte, was one of Lacombe's earliest settlers.

Mrs. Cannon will be greatly missed in the Lacombe district where she was a familiar figure for so long, and where she was known as a good friend and a kind neighbor.

Edmonton Weekly News

By T. B. WINDROSS

EDMONTON, Nov. 6.—The Alberta government has been spending much of its time taking office in making changes in the various departments of the civil service that will forward the consolidation and reduction of overhead costs which it deems needful before the provincial budget can be balanced. Dismissals of several heads of departments has marked this phase of the work of the administration. Premier Aberhart has indicated that this feature of the reorganization plans is not a pleasure, but it is a necessity.

In one or two cases appointments have been made, but in some cases the branches of government have been merged with others necessitating the dropping of some officials. It is a disagreeable part of the undertaking, but patience and confidence that it is all being done for the people's good is urged by the minister.

Reorganization of the insurance commission which came under the department of Hon. E. Manning, provincial secretary, necessitated the dismissal of Henry Brace, superintendent of insurance and provincial fire commissioner. It was announced by Premier Aberhart that the government is considering a plan to carry its own insurance on its buildings. The insurance charges are much too high for the type of building, the premier said. It is proposed to lay aside part of the money paid on insurance each year in a fund which will thus be gradually increased until it is able to carry all the government's insurance risk. This will be a big saving to the province. The sum paid for insurance now is \$45,000.

Of interest to country points is the announcement this week that 12 district agriculturists appointed in April last by the late U.S.A. government will be dismissed. There was provision made in the estimate for the payment of these agents and to continue their services would mean a deficit of between \$30,000 and \$40,000 for the year, the premier explained. This sum would include the cost of cars which were bought for these men to enable them to carry on their activities.

When asked how the work would be carried on, Premier Aberhart said: "There will be sufficient staff left to carry on. Of course there will have to be some reorganization."

The work of district agriculturists under the department of agriculture has been confined very largely to promoting successful farming in various districts. The premier intimated that similar appointments have been made in other departments and the government is looking into the matter. So that there may be other dismissals.

A charge in the public press liberated by W. R. Howson, K.C., M.L.A., Liberal leader, that Premier Aberhart is side stepping from his promise to establish Social Credit and provide dividends brought a reply from Premier Aberhart this week. Mr. Howson said: "Premier Aberhart has no intention of ever giving a basic dividend of \$25 a month to each resident in Alberta. Why does he not tell people the truth?" To this Mr. Aberhart replied: "The government is more anxious than ever to get going as soon as possible in paying basic dividends, which was a main plank in the Social Credit platform. Our position has not changed a bit."

Ruth Hoffman of College Heights, who has been seriously ill following an operation for ruptured appendix is leaving for home in a few days.

Another point of interest in governmental news at Edmonton is the

CENTRAL ALBERTA HOCKEY LEAGUE IS ORGANIZED

At a meeting held in Lacombe on Nov. 3, the Central Alberta Hockey League was re-organized. Delegates from Camrose, Leduc, Ponoka, Wetaskiwin, Red Deer, Stettin, Innisfail and Lacombe were present and a two division league composed of these eight teams was formed. The first four mentioned teams will compose one division and the remaining four teams the other. Each team will play two rounds in its own division and one round in the other division and a schedule will be drawn up to be ready by Nov. 8.

In the league playoff the first and third teams will compete and the second and fourth in the first round, two games to be played and total goals to be won. The winners of this round will compete in the league finals, best two out of three games.

The following officers were elected: Hon. President, Dr. J. B. Long, Red Deer; President, R. M. McKenzie, Lacombe; Vice President, A. Sims, Wetaskiwin; Secretary-Treasurer, Dr. G. E. Decker, Lacombe.

EXPERIMENTAL STATION TESTS SWEDISH BOAR

Last spring the Dominion Experimental Station, Lacombe, received a Swedish Large White boar to test under local conditions. Unfortunately, this boar arrived too late to sire any spring litters but the station now has a number of full litters sired by this boar which will be tested in comparison with pigs sired by a Yorkshire boar imported from England and pigs sired by a Canadian bred Yorkshire boar from Ontario.

The pigs sired by the Swedish boar, although too young for anyone to tell anything definite about them, appear to be good type, vigorous youngsters, and this experiment will be followed with a great deal of interest.

Rimby News

The recently organized Y.P.S. of the town of Rimby, 10 miles north of Lacombe, elected the following officers for the ensuing season. President, Charles Jayne; Secretary, Gwen Parker; Treasurer, Miss Thelma Prevue.

Work on the new United Church building has been started and the building will be completed. The building will be 20x30 ft. with a front vestibule. It is located adjacent to the Bluffton Post office and the Bluffton post office.

Post Office Inspector J. W. Gregory, accompanied by E. J. Catts, both of Edmonton, were in Rimby on Saturday, Nov. 2, relative to a change in mail service for the new Rimby route. Joseph Solberg of Bentley has been appointed to succeed his brother Chester Solberg as head of the route. The change became effective on Monday, Nov. 4th.

Mr. and Mrs. S. N. Rimby motored to Ponoka, Sunday, Nov. 3, and spent two days with their daughter, Mrs. I. J. Harris and Mr. Harris, who reside northwest of Ponoka.

Gordon Wright, local buyer for the Blindman Valley Livestock Association shipped two carloads of cattle to Rimby on Monday, November 4th.

L. H. Hodgins, who assisted at the Rimby Drug Store during the one cent sale last week, returned to his home in Ft. Saskatchewan on Sunday last.

Born—At St. Paul's Hospital, Rimby, Nov. 4, to Mr. and Mrs. J. Aldridge of Leda, a son.

Mrs. W. R. Hoag and baby daughter returned to Rimby on Sunday, after a two weeks holiday spent with relatives in Calgary.

Miss Martha Byers, R.N., is on special duty at St. Paul's hospital.

Group 1 of the L.A. of the United Church remained in the weekly home made cooking on Saturday, Nov. 2.

Around The Town

R. L. Robson, who has been accountant at the Royal Bank for the past six years, has retired from the service, and has been succeeded by W. C. Clark from the Supervisor's department, Calgary.

W. H. Sonerville and R. H. Liska each bought during the past week 25 head of cattle from McKenzie Bros. for feeder purposes.

Fraser M. Layton is in the hospital suffering from emphysema. He will be away from his duties at the Royal Bank for about a month, and will be relieved by R. O. Godfrey from the Calgary Third street branch.

Mike Madden is feeding 2400 head of lambs, which will be fitted for the market this winter. This is an unusually large number for the winter months.

Miss Margaret Trangen, Mirror, who has been very ill with rheumatic fever, is slowly recovering.

Mr. Dezyer of Bashaw, who had his leg amputated following an accident while threshing, is leaving for home this week end.

Mr. Chas. Ludwig, of Mirror, is still in the hospital receiving treatment. He is reported much better.

Poppy Day

Poignant reminder of those spacious days of glory and grieving, "Poppy Day" once more recurs to prompt the citizens of this country in the duties they have inherited from the past generation. To Canadian youth in this year of grace, the deep red petals of the Poppy may not carry the same significance they bore to the youth of seventeen years ago. The symbolism of sacrifice with which the Poppy has become charged is something to which the present generation succeeds only through the recital of the names of those who fought their country's battles, who suffered privations, endured long agonies and finally triumphed amid surroundings carpeted with Poppies.

To wear this humble emblem on Poppy day is to proclaim that amid all the jangling confusion through which this country is striving valiantly to penetrate the heart and mind are nevertheless attuned to a sense of homage due those men whose patriotism inspired 600,000 Canadians to offer themselves for service between 1914 and 1918; of that number more than 60,000 found graves in France and Belgium. And it is over those graves that the Poppy blows in perennial bloom.

The numbered dead were not strangers. They were young Canadians, filled even as the youth of to-day is filled, with the joy of living. So now, were the 170,000 men who in 1935 bear upon their bodies the marks and scars of war—the disabled ex-service men who suffered disablement on behalf of Canada.

To manifest that proud recognition of their place in this country, to mark that tribute which is their due, Poppy Day has been set aside in order that all may join in recalling the Great Sorrow.

The blood-red emblems distributed throughout Canada by the Canadian Legion's vast volunteer organization are the product of disabled veterans, men striving to maintain themselves in the Vets' Shops, administered by the Dominion Government. To purchase a Poppy is a small thing. For every citizen to do so is a big thing.

Let us all wear a Poppy on Poppy Day.

Statutory Holiday Monday, Nov. 11

OTTAWA, Nov. 5.—Remembrance Day, November 11, is a statutory holiday throughout Canada, but there is no Dominion law which calls for compulsory closing of factories and stores. General public recreation, though, usually is given. To all holidays prescribed by Dominion statute.

The ruling of the secretary of state department states: Chapter four of the acts of the Parliament of Canada, 1931, provides that throughout Canada, a statutory holiday shall be observed on 11th day of November, and shall be kept and observed as such under the name of Remembrance Day.

Remembrance Day is therefore a statutory holiday the same as Sunday, Christmas Day, New Year's Day or Labor Day. Under the statutes of the Dominion and of the provinces, Sunday is the only day which is compulsorily observed by the closing of factories and stores. Nevertheless, throughout Canada, general recreation is usually given to all holidays which are prescribed by the statutes of Canada.

Spruceville

Mr. and Mrs. W. Parker and family were Sunday visitors with Mr. and Mrs. English.

A very enjoyable afternoon was spent at the home of Mrs. F. Ramsay on Tuesday, a party being held there in honor of Miss Frances Adams. The bride-elect received some very nice gifts from the ladies present. A mock wedding which caused much merriment was part of the programme. A dainty lunch was then served bringing the afternoon to a close.

Mr. Dave Roden was in Calgary a couple of days last week end.

Remember the date, Friday, Nov. 15, Spruceville Chicken Supper and dance. All arrangements are being made by the ladies for this annual event, so come and bring the family and enjoy a real evening's entertainment. Hughes orchestra will furnish the music.

BLACKLEG PREVENTED

RIMBEY—Gottlieb Grieb, residing in Lacombe, has lost a fine young beef last week from a disease resembling blackleg. Mr. Grieb immediately vaccinated the remainder of his herd. John Grinde and R. McVittie also lost calves from the disease.

LEAVING FOR STATES

F. J. Ramsay purchased the first 1936 Ford V-eight car from Peck's Garage this week. Mr. and Mrs. Ramsay will travel in their new coach model to Walla Walla, Washington, where after a brief stay, they will visit Nebraska, Oregon, Kansas, Missouri and California and will return in the spring to their farm 4½ miles northwest of Lacombe.

LACOMBE ENTRANTS WINNERS IN BEEF CATTLE JUDGING

F. Biglands and T. Pethybridge, of Lacombe, were the successful competitors in the Elimination Contest held at the Edmonton Fall Show this week.

The winning of this contest entitles the boys to enter the Dominion competition at Toronto Royal Fair, with free transportation and accommodation during their stay.

H. Southward and R. Henderson also competed at Edmonton in the same judging competition.

Transient Arrested For Forgery

Jack MacLeod, a transient from Edmonton was arrested last week end by Police Chief McDonald, who picked him up on the street and later competition at Toronto Royal Fair, with free transportation and accommodation during their stay.

In view of the accused promising to make the amount good, as he had secured a job on a farm, the magistrate took a lenient view of the offence, and allowed the accused to go on two years' suspended sentence.

Y.P.S. DEBATE

Lacombe Young People's Society are to debate with Killam on Friday evening, Nov. 15, in the Church Hall. This is the semi-finals of a Provincial League. The subject, of which Lacombe has the affirmative, is "Resolved that the pen is mightier than the sword." Judge Mahaffy of Red Deer will be one of the judges. Don McFadden and Roger Thompson represent Lacombe.

WARM UP FAST

New Plymouth engines warm up fast in cold weather as the result of automatic manifold heat control. With this feature operating during warm-up period, part of the hot exhaust gases in the engine are passed around the intake manifold to heat the fuel mixture before it reaches the combustion chamber.

The possibility of raw gasoline going into the cylinders is reduced to a minimum.

SIGNIFICANCE OF COLOR

What's in color? Red has usually been associated with fire, war, cruelty—the sterner qualities of mankind and the more extreme passions and vices. White suggests light, purity, truth, innocence, peace and related ideas. Blue symbolizes dignity, solitude, sadness, and with its cor-

respondence in color with the heavens, hope, constancy, piety. Purple signifies royalty, pomp, stateliness while black suggests void, gloom, wickedness and outer-darkness. Yellow is an exciting color suggestive of gold, power, and is a symbol of supreme wisdom, prudence, inspiration. In China yellow has been employed as a royal and sacred color. The telegraph blank with its envelope from the very first was printed in yellow, why, is not definitely known. In the earlier days, states the Canadian National Telegraph, a telegram was associated with dread news, illness, death or some other misfortune, but with the tremendous expansion in the use of the telegraph not only for business but social uses as well, this concept has largely disappeared and now its yellow coloring symbolizes importance, urgency, a more marked personal emphasis.

To Test Landrace Swine At Lacombe Station.

A shipment of Landrace hogs, consisting of three aged sows, three gilts and one young boar arrived at the Dominion Station, Lacombe, Alberta on October 17th.

The Landrace is the breed used by the Danes in producing the famous Danish bacon for the British market. These pigs are somewhat similar to Yorkshires, the most noticeable difference being in the large ears, which flop forward over the eyes, almost to the end of the snout. The Landrace is somewhat shorter in the leg and smoother in the shoulder than the Yorkshire, with good length and depth of side and exceptionally well filled hams and hind quarters. The specimens at Lacombe also show high quality of the distribution of breeding stock given by these pigs is that they

Recipes

Some recipes are so good that no thought is given to changing them and each year they taste better. Pickled Beets, Mustard Relish, Celery Pickle, and Pear Jam all come from Grandmother's cook book, while Jewel Jam, Carrot Ketchup are quite new and unusual. The following recipes were prepared and tested by Miss Edith L. Elliot, Fruit Branch, Dominion Department of Agriculture.

Pickled Beets
Wash beets. Cut off tops leaving about one inch of stems to prevent bleeding. Cook until tender. Remove skins and if beets are small leave whole, but if large, cut in slices. Pack in a crock or in jars and in each jar put one tablespoon of horseradish. Pour over them a pickle mixture using one cup vinegar, ½ cup water, ¼ cup sugar, one teaspoonful salt, boil together and pour over beets.

Mustard Relish
1 small cabbage; 6 large onions; 1 head celery; 1 large cauliflower; 12 green tomatoes; 3 green peppers; 3 red peppers; 12 apples.
Put all through the mincer, add 2 cups sugar, 2 quarts vinegar, 1 tablespoon tumeric, ¼ lb. mustard, 1 teaspoon curry powder, 2 tablespoons salt, 2 tablespoons white pepper, 2 tablespoons celery seed. Mix well and cook ten minutes, bottle while hot.

Celery Pickle
Six heads celery, 2 onions, put through mincer. Add 1 cup brown sugar, ¼ lb. mustard, 2 tablespoons salt, 1 tablespoon pepper, 2 quarts vinegar, ½ teaspoon tumeric. Mix and simmer slowly 1½ hours. Bottle while hot.

Pear Jam
10 cups coarsely chopped pears; 5 cups sugar; ½ cup chopped preserved ginger with syrup. Boil all together until thick and clear.

Jewel Jam
Four cups chopped quinces; 4 cups chopped apples; 2 cups cranberries; 2 cups water.
Cook cranberries with water and skins and cores of apples. Drain through a jelly bag and to the juice add chopped apples and quinces. Cook five minutes, add five cups sugar. Cook until thick and clear.

Carrot Ketchup
Four cups chopped carrots; 1 green pepper chopped finely; 1 onion chopped finely; 1 cup chopped celery.
Two cups vinegar, ½ cup sugar, 2 teaspoons salt, ½ teaspoon paprika. Cook until thick, press through a fruit press or coarse sieve, reheat and bottle hot.

RUBARB FOR WINTER
(Experimental Farm Note)
Fresh, crisp, pink rhubarb can be had during the winter months if the plants are made now, to provide roots for forcing. The root system of this plant is a storehouse in which the necessary food has been stored and when given the required check and rest period, will produce an abundance of leaf stalks.

First arrange for crowns that have been in a plantation for at least two years or until they are well developed. Crowns that are over four years in a plantation do not force as well as these of the

Thriller Picture Will Be Shown Here Next Week

Here's a shocker picture vastly different from any you ever have seen. The company that gave you "Dracula," "Invisible Man" and "The Bride of Frankenstein" now flashes before your eyes another weird, shivery thriller with a masterpiece of make-up to set the country talking.

You see before you—but hardly dare to believe—a terrific transformation take place—a man changes into a werewolf! An amazing trick the camera more magical than that used in "The Invisible Man."

Two scientists fight to procure the mariphasa flower—the only antidote for the mysterious werewolf's bite. One captures it. The other tracks him in London and steals the flower. There follows a series of mysterious murders. Terror stalks through the city. Scotland Yard is baffled.

Our beautiful young heroine is about to fall victim to the horrible werewolf when a bullet kills the monster. As it dies, there is another indescribable transformation—it turns into a human being again—into her husband.

Younger plants. In late October or early November, just before the ground freezes up, the roots should be dug, allowing a good ball of earth to adhere. Leave these on the surface of the ground without protection until they freeze through. Sub-zero freezing, however, is not recommended. Four or six crowns of fair size will, as a rule, produce enough rhubarb for a family of three or four.

The crowns or roots being given the required period of dormancy are then brought into a dark cellar, where the temperature can be maintained at 50 degrees F., placed on the cellar floor and covered with soil, sand or cinders. The soil, sand or cinders hold the moisture and the roots. Another very good way is to place one large crown in a bushel hamper or box, packing soil around it to hold the moisture. Where several roots or crowns are to be used they can each be placed in a hamper or box. This method is very convenient for handling, where small numbers of roots are to be forced. In commercial forcing, the roots are placed as closely together as possible, on the forcing house floor or under greenhouse benches, and soil, sand or cinders placed around them. Water is applied when required.

To give continuity of harvest the roots or crowns should be brought into the forcing cellar at intervals of two weeks apart. It usually requires around three weeks to a month for the crop to be ready for pulling. If the roots are to be used for planting out again in the following spring, it is unwise to remove more than five pullings. After the fifth pulling the crowns should be put outside and allowed to freeze up again.

For forcing purposes it is unwise to use poor quality varieties, although some growers use seedlings. To obtain an even and uniform product, Ruby, MacDonald or Victoria will be found quite satisfactory, but where large stalked rhubarb is desired the Sutton variety will be found very useful.

CANADIAN FACTORY CHEESE
According to the Dominion Bureau of Statistics, the production of factory cheese in Canada in 1934 totalled 99,346,637 pounds, valued at \$9,797,398, reaching both for quantity and for value the lowest point recorded during the present century. Compared with 1933 there was a decrease in quantity of 11,799,865 lbs., or 11 per cent, and a decrease in value of \$1,530,586, or 12 per cent, while the average price per pound dropped from 10.01 cents to 9.86 cents.

Ontario and Quebec together produced 96 per cent of the total, the former with 73,301,029 pounds, or 74 per cent, and the latter with 21,676,738 pounds, or 22 per cent. Slight

J. T. NEICE, Prop. PHONE 64

Mr. J. T. McNeice has taken over the local Flour Mill and in so doing is prepared to give the residents of the district expert and efficient service. The mill has been modernly equipped with Cleaners, Scourers and new devices to ensure the best possible grade of flour, and I bespeak for Mr. McNeice a continuance of your patronage which has made it possible to operate and offer flour in our district at greatly reduced prices.

E. C. CHAPMAN.

CENTRAL-SMART INEXPENSIVE

Alberta Provided 6.7 Per Cent of Dominion Gas Tax

Alberta with 7.91 per cent of the total motor vehicles in the Dominion, accounted for 6.7 per cent of the total net gasoline consumption and provided 6.7 per cent of the total gasoline tax collected by the provinces during 1934, according to tabulations from the Dominion Bureau of Statistics for 1934 just completed.

Ontario was the highest, with totals of 48 per cent of the motor vehicles, 49.9 per cent of the gasoline consumption and 47.9 per cent of the gas tax revenue.

Statistics of other provinces, in order, were: Quebec with 14.65 per cent of the motor vehicles, 18.4 per cent of the gasoline consumption and 17.8 per cent of the gas tax revenue. British Columbia with 8.14 per cent of the total motor vehicles, 6.7 per cent of the gasoline consumption and 7.9 per cent of the gas tax revenue.

Saskatchewan with 8.09 per cent of the total motor vehicles, 5.6 per cent of the gasoline consumption and 5.9 per cent of the gas tax revenue.

Manitoba with 6.23 per cent of the total motor vehicles, 5.4 per cent of the gasoline consumption and 6.09 per cent of the gas tax revenue.

Nova Scotia with 3.71 per cent of the total motor vehicles, 4.94 per cent of the gasoline consumption and 4.4 per cent of the gas tax revenue.

New Brunswick with 2.57 per cent of the total motor vehicles, 2.4 per cent of the total net gasoline consumption and 2.9 per cent of the gas tax revenue.

Prince Edward Island .65 per cent of the total motor vehicles, .45 per cent of the total net gasoline consumption and .58 per cent of the gas tax revenue.

Bentley News

Mr. and Mrs. C. W. Hergott and son Clifford were over Sunday visitors in Edmonton. Mr. Hergott was in attendance at a meeting of the O.R.T. while there.

Mrs. Faye Johnston was hostess to the W.M.S. at their regular monthly meeting on Tuesday afternoon last. Following the business meeting the hostess served lunch. Skies cleared for a couple of days last week and allowed a few belated jobs of thrashing to be finished, but at time of writing (Monday) snow is again falling.

Mr. and Mrs. Cecil Suggett left Friday evening for Winnipeg. Mr. Suggett will attend the annual meeting of the U.E.G. while away and they will visit relatives of Mrs. Suggett at Saskatoon and around Winnipeg.

Messrs. Joe Stephenson and W. W. Whitesell went out by team on Oct. 26 to the Bentley hunting lodge to put it in order for the yearly big game hunters of Bentley district. Messrs. Ray Gideon, J. McPherson and Jake Whitworth left early last Saturday morning to join their but on reaching Rocky Mountain House the report of the roads beyond there was such as to cause them to return.

The Ladies' Aid of the United Church journeyed to Lacombe in a body on Friday afternoon, Oct. 25, to visit a former member, Mrs. C. Oberne, who has lately taken up residence there. The ladies spent the afternoon in an informal social way and following lunch Mrs. R. Miles on behalf of the organization, in a few well chosen words, presented Mrs. Oberne with a reading lamp. Mrs. Oberne has been a loyal member and she will be missed in the circle.

Remembrance Day

Contributed by Rev. J. F. Butcher, Chaplain, Medicine Hat Branch, Canadian Legion, B.E.S.L.

The Eleventh of November has been set apart by the Government of Canada as "Remembrance Day". On this date seventeen years ago the Great War ended. A war which lasted over four years and in which 662,268 men and women of the British Empire, including 60,000 Canadians laid down their lives for honor, justice and freedom, principles for which we too should be "ever ready to live or die valiantly."

"Remembrance Day" is not a holiday; it is a Holy Day, sacred to the memory of our heroic dead. It reminds us that Canada stood with the other great Dominions side by side with the Motherland; that nearly 600,000 Canadians were under arms; that 2320 nurses enlisted; that both nurses and men proved themselves equal to those who had years of training for active service; that thousands of broken hearts and bodies and blighted lives resulted; and that 60,000 Canadians lie sleeping in the "Gardens of the Dead" in Flanders and other battlefields.

Why? The answer is given in the words of Sir Robert Borden, then prime minister: "Not for love of battle, not for forgetting Vimy, are forever emblazoned on the standards of Canadian regiments and on the hearts and minds of those who survived."

You are familiar with the following words: "My duty to my country is to love it, to obey and maintain its laws, respect its flag, and to defend it against all enemies." This is exactly what these brave men and women did who gave their lives for the land they loved. Is it not fitting therefore, that this day should be set apart as a memorial to them, and as an opportunity for us to salute them in reverence and gratitude.

There are set up in almost every city, town and village in Canada, memorials to those heroes. Respect, and care for these evidences of our

country's gratitude all your lives, for on them are engraved the names of those who made the supreme sacrifice that you might live in peace and safety.

On Nov. 11 an Empire will stand at attention, its speech silenced, its thought censored upon the brave dead. It is inspiring to know that millions of grateful people in our vast Empire will take part in this sacred act of remembrance. Will you join them? Be present at the ceremony at the Cenotaph, and in the "Two Minutes Silence" listen to the spirit voices of the War dead in the great beyond as they cry:

"To you from falling hands we throw
The Torch—be yours to hold it high;
If ye break faith with us who die,
We shall not sleep though poppies grow
In Flanders Fields."

NOTICE

Armistice Day

NOV. 11, 1935

Veterans and citizens will please note that the annual service at the Cenotaph will be held commencing at 10.45 a.m.

Veterans are reminded to foregather at Town Hall not later than 10.30 a.m. when they will form up and parade to the Cenotaph.

A large turn out of veterans is especially requested.

HALLOWEEN

Halloween passed with little damage being done, thanks to the precaution taken by Chief of Police Archie Macdonald, who had four men on patrol that night. With the exception of a few outhouses being turned over the night was quiet, and by midnight the streets were deserted. The following day the chief got the boys responsible for the prank and made them put the outhouses right side up.

Recreation A Vital Necessity

Ever since some authority discovered and told the world that every man should have a hobby, the dictum has been reiterated at intervals by later authorities with varying degrees of emphasis and sometimes by those who are interested in promoting some form of amusement or recreation.

Whether uttered, however, with or without an ulterior motive the assertion is one which has a sound foundation in psychology and human experience. It is of great value and as well founded as that more popularly known saying: "All work and no play makes Jack a dull boy."

While a hobby or recreation is a valuable adjunct to work for man at all periods of his march from the cradle to the grave, in at least two stages of his progress, in youth and in old age, it is an absolute essential if he is to achieve the good life—happiness.

The word recreation itself gives a clue to the reason. Re-creation, the making over again of the individual as he seeks relaxation from the "trivial round and common task" means what it indicates.

Unless a man is content to be a dull clod, he must refresh and re-create himself by seeking relaxation in some pursuit which, for the time, will lift him above the cares and worries incident to earning his daily bread and providing for the needs of those dependent upon him. He needs some interest, which will infuse rest into aching limbs or brush away the cobwebs from the brain.

In youth this diverse interest may take the form of athletics, mechanical activity and with a minority, some more sedentary type of relaxation, but no matter what form it may take, it is essential to the development of a sound, robust citizenship, that youth should be allowed time for recreation.

The lad or young man without a hobby is apt to become morbid and unhealthy introspective. Youth is normally a period of superabundant energy and this overflowing vivacity should be allowed to express itself in forms of healthy recreation, and if it can be used as a step ladder to a life vocation, it is that much more to the good.

Many a youth has "found" himself in the pursuit of a hobby. History is full of stories of boys and young men who have made good in later life because they have been allowed to follow their bent and of many more who have done so despite overwhelming obstacles and discouragements. By all means encourage the young man to take up some interest, apart from his daily work and chores.

And if a hobby is essential to youth it is vital to old age. There is no more pitiful sight than the old man whose physical powers have waned and who has no interest in life or in living. Such a man is a burden to himself and an incubus to his associates. He is misery personified and makes miserable those with whom he comes in daily contact.

But the old man who has built up an interest secondary to the life work which he pursued in his prime is spared these pains and penalties of advancing years. As he becomes physically enfeebled he is able to turn his hand and his mind to a pursuit which daily grows in fascination, because it can be taken for granted, that the hobby which he has developed is something which he likes and in which, therefore, he can excel. Such a pursuit will go far towards prolonging life itself and will certainly give zest to the declining years. Gloom will give way to sunshine and contentment will displace moroseness.

But it is too late for the aged to develop a hobby after they have reached the mere and yellow. The old adage, "You can't teach an old dog new tricks" is applicable to humanity. There may be exceptions but that is the rule. That is one of the reasons why, even during the crowded years of prime and middle life, a recreation is not only advisable but essential. It is an insurance policy for a contented and interesting old age.

Moreover the man who diversifies his interests beyond his life's vocation, even during the period when life is at the full, is more likely to have an old age in which to further develop his hobby. It need not necessarily be something apart from his daily work. It may well be something related to it, in which event its pursuit will yield additional interest and perhaps more tangible dividends in the task of making a living.

Might Spoil Their Appearance

Army Troopers Prefer Jail To Having Hair Cut

Troopers of the Czechoslovakian army went on strike recently to escape the great peril of having their hair cut. About 40 of them were stationed at Olomouc and refused to obey their commanding officer when he ordered them to report to the barbers for a trimming. They clung to their determination not to have their hair cut and were sent to cells. Their reason, they said, was that they were about to be discharged from the army and would have to look for work. Everyone knows that a smart appearance counts for a lot in getting a job, they pleaded, but who can look really smart with one's hair cut like a convict's?

Compiling Jewish Dictionary

Will Be First One Ever Prepared For Publication

Declared to be the first dictionary of the Jewish language ever compiled, a work being prepared for publication by the Institute of Jewish Proletarian Culture of the White Russian Academy of Sciences, according to a report from Moscow, it will be issued in three volumes. The White Russian State Publishing House is also preparing to publish Jewish translations of the world's literary classics. Among the first to appear will be Shakespeare's "Othello" and "Romeo and Juliet" and Schiller's "William Tell."

Heading the best sellers among Braille books published by the National Institute for the Blind in Great Britain are the Bible and an Edgar Wallace novel.

Customer—"Are those eggs strictly fresh?"
Grocer (to his clerk):—"Feel of those eggs, George, and see if they're cool enough to sell yet."

Tribute To Carnegie

Gave Away Ninety Per Cent. Of His Fortune For Human Benefit

The celebration of the centenary of the birth of Andrew Carnegie, which has just been announced, will tell the new century in what gratitude, esteem and affection these first hundred years held him. In his letter of instructions to his trustees he spoke of "my chief happiness" in the thought that even after he passed away the wealth that came to him to administer as a sacred trust for the good of his fellowmen would continue "to benefit humanity for generations untold."

But it will be not alone his benefactions that will be remembered by these generations. His gospel of wealth, his belief in a triumphant democracy and his adventure for wealth, which he preached and practiced, his "theory," which he made a reality, of the responsibilities of wealth—responsibilities to be voluntarily met and not left to governmental compulsions. It is stated by his biographer that he gave away for the improvement of mankind \$350,000,000, or, in percentage of his fortune, 90 per cent, for public use and kept 10 per cent. for himself and his heirs.

This was no "unconsidered improvisation." When he was only 33 years old he pledged himself to give away each year his "surplus" for benevolence. This he made his "duty" and it became not only his personal contribution to the social problem but a persuasive example for others. Libraries and laboratories, centres of music and galleries of art, were but the visible evidences of a clearly conceived and nobly executed purpose.—New York Times.

Building Up Air Force

Chinese Dancers Are Willing To Help Aviation League

Dancers are to do their bit in helping China get together a strong air force. This is a result of a request by the China Aviation League to the proprietors of Chinese dance halls in Shanghai for a charge of five cents for every dollar earned in their establishments to go towards a fund for the purchase of airplanes. The dance hall owners will pass the five cents charge on to their customers. The proposal has been accepted by 20 dance halls and others are expected to notify the Aviation League of the compliance before many dance-nights have passed.

Idea For Poultrymen

Chickens May Be Tattooed With Brand Of Owner

Chickens, fattened on the wing, may soon become the present-day counterparts of the flank-branded cattle and horses of the old west, and for the same reason—to foil thieves. A system of identification, endorsed by the Northeastern Poultry Producers' Association is based on numbers made in the skin-webs of chickens' wings and then filled with indelible ink. Each poultry-raiser has his own "brand," which is registered, and entered in identification books distributed to law-enforcement agencies.

Will Meet In Vancouver

Canadian Legion Convention To Be Held Early Next Year

The sixth convention of the Canadian Legion will be held early next year at Vancouver, a communication from Dominion headquarters to the organization said. The "veterans' parliament" will assemble late in February or early in March, but the date has been left to the Dominion president, Brig-General Alex Ross, of Yorkton, Sask.

Monkeys Start Fire

Baboons were blamed for a series of forest fires in the Drakenstein mountains of South Africa. While hunting scorpions, the baboons were said to roll rocks down the slopes, striking sparks and igniting dead grass.

Crop Worth Half Million

Growers estimate the 1935 crop of hops in the Fraser Valley at 1,700,000 pounds with a value of half a million dollars. This represents an increase of 300,000 pounds over 1934. Some 2,000 pickers were employed in harvesting the crop.

The use of bright colors at Easter time is symbolic of the rays of the aurora and the dawning hues of the Easter sun.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel tired a lot 'weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia just as it is.

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS'" or the convenient new "PHILLIPS'" Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets. Each tiny tablet is a powerful antacid. A teaspoonful of gentle liquid "PHILLIPS'" Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Modern Science Cured Cures

Triumphed Over Superstition Held By Australian Natives

Modern science was required to "cure" the crime of an aboriginal Australian native woman, it was reported at Sydney.

Convinced that she was beset by malignant spirits, the native was brought in serious condition to Belting hospital, New South Wales, for "treatment."

The native belief is that an enemy can cast an "evil eye" spell on another member of the tribe by taking pieces of his or her clothing into the mountains, reciting incantations to the devils, and leaving the fragments there.

The woman had mislaid portions of her scanty wardrobe after a bitter dispute, and was convinced she was under the legendary "evil eye."

She became violently ill and was advised to consult the most powerful tribal medicine man. Prevailed upon by a white man, she submitted to the Belting hospital.

There, by pre-arrangement, she was submitted to X-rays and was told by her physician that, had "debil-debil" been at work on her the rays would have revealed it, and that the machine showed no trace.

Immediately and incredibly, the woman "patient" recovered. And science chalked one of its most graphic triumphs over superstition recorded in these parts.

Receive Cordial Welcome

Employees On Beasborough Estate Glad Family Is Home

The Earl and Countess of Beasborough and their family received a cordial welcome from employees of their estate when they returned to their home, Stansted Park, Hampshire, England.

The earl has just completed his term as governor-general of Canada. Flags waved as the Beasboroughs' motor coach, with the archway of foliage bearing the words "welcome," an address of welcome was presented.

Parents and children from the estate were entertained at tea and a bonfire concluded the celebrations.

Watch Stopped Fifty Years

Massive Key Winder Runs Again After Long Rest

A watch that did not run for 50 years owned by Louis Towers, retired section man at Fort Erie, Ontario, is now running merrily, and ticking off the minutes just as it did back in 1875 when it was first built. The massive affair, enclosed in a solid silver double case is a key winder. It was first owned by his grandfather, Louis Towers the first of Glasgow. A jeweller has just cleaned and repaired it.

Cheat Grass New Menace

Range Pastures In Kamloops Area Show Growth Of Weed

A warning is given by Dr. S. E. Clarke, of the Range Experiment Station at Nanaimo, B.C., of the spread of cheat grass which has proven to be a troublesome weed in Montana. It has been found in range pastures in the Kamloops area. At other points it appears in waste places and along railway tracks. In appearance it resembles dwarfed wild oats.

In Pernambuco, piano movers carry the instruments on their heads. Six men carry the load, and the seventh goes ahead to clear traffic.

The last sailing ship built in Great Britain was the Archibald Russell, which was built in Glasgow in 1905.

Mounted Section Necessary

Separate Division Of R.C.M.P. Is Being Considered

The old order changed. The Mounted Police are considering forming a mounted section in the force, according to the annual report released at Regina headquarters.

"If present plans are advanced to completion," the report states, "the subjects of equitation, mounted drill and stable management will be undertaken by those assigned to the mounted section only."

The report states difficulty is experienced in completing the training of some recruits within the prescribed period of six months when intensive training in equitation is included in the syllabus.

Some recruits may be assigned to mounted duty only, while others will take instruction in more modern and rapid means of travel.

Despite reports that the force was slowly but surely doing away with horses, Major-General Sir James H. MacBrien, commissioner, states in the report that "there is no intention whatever of dispensing altogether with the mounted man. A well trained mounted unit of sufficient number is invaluable to any force which may have to deal with unruly crowds."

At the present time, the report states, the force throughout the Dominion has 235 saddle horses and 19 team horses, and of these, 88 saddle horses and 13 team horses are located in Saskatchewan.

Other means of land transport owned by the Mounted Police are 11 motor cars; 34 motorcycles; 19 motor trucks; three railway gas cars and 413 sleigh dogs.

Of that number, there are 96 motor cars, four motor trucks and 28 dogs stationed in Saskatchewan.

The force also operates 11 cruisers and eight patrol boats in preventive services on the eastern and western coasts.

Palm Tree Transplanted

Weighed Thirty Tons And Was Severely Fret Tall

Port Director Brennan of San Diego wanted a palm in the centre of the wide intersection at the foot of Broadway and the Embarcadero, to divide traffic. Twenty-four hours later, a Moroccan date palm, 70 feet high, was taken to the city from the slimmest point, weighing an estimated 30 tons, had "grown" in the desired spot.

The tree, 52 years old, believed the largest tree ever transplanted on the Pacific Coast, was dug from the island of Hawaii, four miles from its "new home," where a crew dug a hole 14 feet deep and 30 feet across.

While a tractor and trailers were hauling the tree, a temporary railroad spur was laid atop the Embarcadero pavement, and a railroad crane ran to the hole. Waiting when the tree arrived, the crane picked the tree up and set it in the hole.—Los Angeles Times.

Experiment A Success

British Eggs Despatched By Air Hatched In Australia

An experiment in sending British eggs by air mail to Australia, to be hatched by Australian hens has proved a great success, as two sturdy Rhode Island chicks hitherto unknown in Australia prove. Mr. P. P. Finney, assistant secretary of the Poultry Club of New South Wales, received two settings of Rhode Island Red eggs by air mail. They were despatched fifteen days earlier by Lord Greenway from his farm at Stanbridge, Essex, England (Hampshire). The two chicks hatched out 23 days after receipt.

Discover Ancient Temple

Important Find Made By Women In Palestine

The discovery of an ancient temple dating back to 3000 B.C., the Yacly Bronze Age, on the Biblical site of Ai, where Abraham was said to have built his first altar to Jehovah, was reported. The important archaeological find was made by a Palestinian woman, Judith Krause Marquet, whose work was originally financed by the late Baron Edmond De Rothschild, of Paris, and which is now being continued by the French National museum.

If wood is completely submerged in water and kept so at all times, it will not decay.

Modesty is just a matter of concealing what you think of yourself.

KIDNEY TROUBLE

will result in headaches, backaches, broken sleep, and a tired, listless feeling during the day. At first, it is often mistaken for indigestion or any of these symptoms, take Gin Pills for prompt, safe relief.

You'll feel better, look better, and sleep sounder.

SMARTNESS AND GRACE HEAVY FIGURES IS MODEL PATTERNS FOR TO-DAY - EXCEEDINGLY SIMPLE TO MAKE

By Ellen Worth

Much enthusiasm is shown the lovely new dull silks that look like wool, that made this simple smart dress. And incidentally, they have a very alluring effect and are a boon to heavier figures.

The metallic threaded trepe of the surplice vestee and jabot fill, add to the Renaissance elegance of this slimming dress of black wool-like silk.

It's a very helpful style for women of heavier build.

Style No. 724 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 1 yard of 30-inch contrasting.

Patterns 16 each. Address mail orders to: Fashion Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Let the new Fall and Winter Fashion Magazine assist you in assembling your family's fall clothes. There are designs for every type and every occasion. And of course one of our perfect-fitting patterns is obtained for every design illustrated. Don't delay! Send for your copy to-day!

When Home Looked Good

Noted Explorer Took Pleasure In Being Domestic

That Sir Henry Stanley suffered many deprivations in his long and dangerous search for Livingston, in the then unexplored wilds of Africa, goes without saying. How good home looked to him when he finally got back is illustrated in a little home incident.

While engaged in writing the story of his search, "In Darkest Africa," he used to spread his reference maps out on the floor for easy reference.

One day he needed a certain map, and it couldn't be found. He and his assistant looked far and near for it; then the assistant found the desired map—sprung in front of the grate, and Stanley's favorite cat asleep thereon!

Stanley interferred: "Never mind," he said gently, "don't disturb the cat. I'll get along without the map until she wakes up. If you only knew how good the sight of that domestic cat, curled up in front of a bright English fire, looks to me, you would never chase her away." So the cat slumbered on, and not until she rose, with a lazy yawn, did Stanley reach for his map.—Christian Science Monitor.

Aged Pioneer Scorns Relief

Man 95 Conducts Farm And Operates Trap Line

Tom Dowd, 95-year-old pioneer of the Kootenay, B.C., district, is still self-supporting and proud of the fact he has never accepted a cent of relief money.

He lives on a small farm, has an acre potato patch which he cultivates by hand, and makes extra money on a trap line. "Of course, I could have got more, but my trap line was only six miles long, and I couldn't handle a longer line," the nonagenarian said.

Three years ago Mr. Dowd had a little trouble with his teeth, and had to go to a dentist and have seven of them extracted, but he says he comes of a hardy stock, as his grandmother lived to be 111 years of age.

Must Have Good Method

Tokio Claims To Know Number Of Flies Swatted

In Tokio they have a way of counting the flies they swat. You have the word of Norimi Iguchi, health prevention chief, that exactly 106,124,516 flies were swatted in Tokio in two days. He does not say who counts them or how, but he explains that the slain flies were packed in 175 large sacks. The champion fly-killer was a fish merchant, who felled 93,000 with deadly accuracy.

Swing Back to Ogden's

Thousands of other "roll-your-owners" are swinging back to Ogden's Fine Cut simply because only Ogden's gives them the satisfying cigarettes they want. With better times, you too, can afford the little that Ogden's Fine Cut costs, and it means everything in smoking enjoyment. Ogden's rolls best with "Chanticleer" or "Vogue" papers.

32 Poker Hands, any numbers, now accepted as a complete set.

OGDEN'S FINE CUT
Your Pipe Knows Ogden's Cut Plug

Assistance Will Be Given

Alberta Government To Help Exhibitors At Winter Fairs

Alberta Government will once again assist seed grain exhibitors at the Toronto Royal Fair and Chicago International this fall. For the Royal Fair, entry fee and shipping costs to Toronto will be paid on boys' and girls' club exhibits. Return shipping costs will not be paid.

At Chicago International Hay and Grain Show, where Alberta has made such an outstanding record in seed grains for the past 15 years, the government will pay shipping costs on approved exhibits. Prize money in the regular grain sections at Chicago won by Alberta exhibitors will be duplicated by the provincial government.

In the case of one or more first prizes or championships being taken, a special bonus of \$50 will be granted, which will be increased to \$100 in the case of championships in wheat, oats or barley. The provincial seedgrains branch will as far as possible supervise the arrangements for the exhibits.

Negotiations for the laying of a telephone cable to cost \$350,000 are to be opened shortly between Denmark and the British General Post Office.

NOW TAKE HEALTH

from LITTLE MANITOU SPA

FAMOUS MINERAL SALTS BROUGHT TO YOU

Carlsbad, Vichy and other resorts in Europe, are famous for their mineral springs. Canada, too, has its Carlsbad, for Little Manitou Lake in Saskatchewan is an amazing lake—a lake of wondrous virtues—yielding medicinal salts of potent curative properties.

These powerful health-giving salts are extracted from the waters of Lake, cleaned and prepared, with the addition of iodides, by expert chemists. They are then available to you as "Saskalax," a very fitting name for these medicinal salts.

Saskalax is a non-effervescent salt highly recommended in all ailments arising from over-acidity of the blood.

If you suffer from Rheumatism, Neuritis, Kidney Disorders, Kidney and Liver troubles, Impure Blood, Skin Eruptions and Consumption, a short course of Saskalax will soon put you in the chorus singing its praises. If you are drifting along in indolent health, one bottle of Saskalax will give you a new experience of what it feels like to be in good health. If you think you already enjoy good health, take a sample of Saskalax and then judge if your stomach, kidneys and bowels needed the flushing Saskalax gave them.

On sale at your druggists—enough for 10 weeks' treatment—60¢ a bottle.

Many Changes Brought About In Canada Through Motor Car Development

Canada's highways and motor cars present a striking illustration of changes brought about by progress and invention.

In the early days of settlement, roads were auxiliary to water routes as avenues of transportation. They were used during the summer season when portages were necessary to avoid obstacles to river and lake travel, and during the winters when ice prevented navigation. The growth of population and the demand for means of communication between settlement points soon made necessary the introduction of overland routes, and road construction in Canada got under way in the pioneer stages of the development of the country. Exclusive of the streets in cities, towns and incorporated villages, the total mileage of surfaced roads in Canada at the end of 1934 was 93,642, over half of which was in Ontario. The mileage of unsurfaced and improved roads was 315,077 miles, making a total of 408,719 miles of rural roads in Canada.

The automobile has played a most important part in Canada's road history, especially during the last twenty years in which the motor car has come to rank as a necessity of life to a large proportion of the population. The motor car made its advent in Ontario in 1904, when 535 vehicles were registered, and from that meagre number registrations in the Dominion as a whole grew by leaps and bounds until in 1930 they reached the peak figure of 1,232,489 in 1930. The next three years showed a slight decline, but in 1934, the automobile again gained ground with registrations totalling 1,129,532 vehicles, a gain of 48,775 over 1933.

Canada has a wealth of highways and motor cars, and the extent to which the Canadian people now enjoy the educational and recreational values of travel reflect the new and higher standards of living which progress and invention have placed practically within reach of all.

Rusted Wheat

Grain Board's Report Show 17 Per Cent Graded As Rusted

Some indication of the damage caused by rust to western wheat is given in the report of the statistics branch of the board of grain commissioners on the movement of western Canadian grain for September. Approximately 17 per cent is graded as "rusted." Improvement in exports of wheat is foreseen.

The export movement of Canadian grain to overseas destinations has been slow indeed during the first two months of the crop year. There are, however, abundant indications of a substantial improvement developing.

Now that the movement from country points is in full swing, a better idea of the effect upon this year's crop of rust and unfavorable climatic conditions is obtainable. Using the inspection reports for the first nine days of October as a basis of calculation, 17 per cent of cars of bread wheats graded into the "special" (rusted) wheat grades and feed, 14 and 48 per cent, 3 northern and 3 southern. The heavy increase in the proportion of light-weight grain is reflected in the lower average weight per carload unloaded at the terminals, 1,474 bushels in September as compared with 1,518 bushels a year ago.

Method Would Work

Concerted Effort Only Way To Help Ill Of World

What is the sense in grousing? What dividends do we get from gloating over the ills of the world? What we have to do if we are to meet our share of the contribution to the welfare of mankind is strive to better evil conditions. This sounds like preaching but it is not so intended. The only method by which improvement in world, in national, in provincial, in local and in individual conditions can be achieved is through individual and concerted effort in one direction. Which is to say that every one of us has an obligation. The trouble is that we permit selfishness to override us and hence come the problems which so beset us.—Country Life in B.C.

Plan Has Proved Success

That the experiment of the Canadian railways in the introduction of their pick-up and delivery freight services has proved to be an unequalled success, the "ignorant people's tax," which is the backbone of the drive against illiteracy. More than half the citizens of Nanaimo can neither read nor write, and the government has decided something must be done about it.

Memorial Candle

Enrico Caruso's memorial candle, which was 16 feet high, five feet in circumference, and weighed one ton which first lighted, is burned one day each year—All Saints' Day—and will last 18 centuries, it is said.

"That Miss Smith can't tell a thing without exaggerating." "Did you ever ask her age?"

New Map For Saskatchewan

Much Detail Is Included In This Carefully Prepared Map

Much information has been provided through federal and provincial departments on a map of the southern part of the province of Saskatchewan recently issued by the Topographical and Air Survey Bureau of the Department of the Interior, in co-operation with the provincial Department of Natural Resources. The map covers the greater part of the settled area of the province, as it extends as far north as township 62, including Prince Albert National Park north of the city of Prince Albert.

Most of the area covered by the new map is prairie country but, to the north and northeast, some of the forest lands are shown. The chief rivers within the area are the North Saskatchewan, the Qu'Appelle, and the Carrot, all intersecting the province from west to east.

Provincial forests appear prominently and include the Pasquia-Hills, Porcupine Mountain, Big River, Meadow Lake, Bronson, Fort à la Corne, Cypress Hills and Elbow. Provincial parks such as Nipawin, Wood Spirit, Moose Mountain, and Green Lake are also shown, while Indian reserves are indicated clearly.

The chief urban centers within the area and appearing on the new map include Regina, Saskatoon, Moose Jaw, Prince Albert, Swift Current, North Battleford and Weyburn.

Prepared on a scale of 16 miles to one inch and in a handy size of 36 by 26 inches, the new map gives the degrees of latitude and longitude throughout the area covered, and shows meridian, range, township and section lines. The vast network of railways are indicated in the customary black, while lakes and rivers appear in the light blue that is generally used to signify water areas.

A very important feature of the map is the information provided regarding highways, which includes both the route numbers and the type of road.

Copies of the new map may be obtained at 25 cents each by applying to the Surveyor General, Department of the Interior, at Ottawa, or from the Department of Natural Resources, Regina.

Geological Survey Work

Large Areas In West Are Found Favorable To Prospecting

Large areas of territory favorable to prospecting have been brought to light as a result of this season's geological survey work which sent 188 parties to the field in 65 provinces financed by \$1,000,000 provided under the supplementary public works act.

The surveys found territory suitable to prospecting for gold and at least one promising silver area. Those geologists who have already returned from the field are busy preparing their reports which will be made available to prospectors next year.

Surveys in one area of the north-west territories revealed about 2,900 square miles of good prospecting ground for precious metals deposits and one showing showing gold was staked by prospectors in the wake of one of the government parties.

One of the Manitoba projects reported it had mapped 200 square miles of favorable gold prospecting ground. Some prospecting areas were found in Northern Saskatchewan, while a British Columbia party found tests should be made of tertiary gold-bearing gravels overlooked in the early placer mining days when the district yielded rich rewards.

In an area west of Lake Superior copper-nickel mineralization of the Sudbury type was found. Sporadic outcroppings, not yet proved of economic significance, occur over a distance of 14 miles. Three square miles in the same district were found favorable to occurrence of silver.

Must Be A Good Car

Lady Motorist Makes Long Trip In Old Automobile

From Mexico City Montreal via the Pacific coast, about 5,200 miles. In 24 days, in a 12-year-old car with some 250,000 miles to its credit is the trip recently completed by Mrs. Charles Weber of Vancouver, who motored to Montreal to visit relatives.

Mrs. Weber has driven the same automobile five times across the continent, and about five years ago, drove it on a tour of European countries. She says it is still going strong.

Could Not Be Done

A man presented two keys tied with string to a clerk at Leeds Post Office in England and asked for them to be forwarded with a telegram which he wished to send. He was surprised when he was told this was impossible. He said he understood money could be forwarded with a telegram.

High Financing

June Bride—Jimmie, here's a scientist who says that anything weighing one pound on the moon would weigh six pounds if it were transferred to the earth.

June Hubby—Couldn't you manage to buy our groceries up there so as not to draw the cost of living?"

Made Unlucky Catch

Torpedo Very Nearly Brought Disaster To Fishing Boat

A torpedo weighing several hundred pounds, entangled in the net of the Hamburg fishing cutter Frieda, nearly brought disaster to ship, crew and cargo. The vessel put into Schuller Harbor near Hamburg by its deck almost burned away and its lifeboats destroyed by fire.

The skipper, Captain Jonas, explained that the unlucky catch was made off Heligoland, and when the head of the torpedo was hauled on deck for some unknown reason it burst into fierce flames. The deck caught fire and even the glass of the wheelhouse melted. The wheelhouse, the mast and rigging were all destroyed. The terrific heat made it impossible to fight the flames at first, but the crew later made desperate efforts to keep the flames down, fearing that the oil tank would explode. Fortunately, the fire was extinguished before the engines were affected. The crew escaped injury.

May Not Sign Contracts

Kansas Farmers Not Sure Wheat Production Should Be Restricted

Whether new wheat control contracts will be signed by Kansas farmers under the United States Agricultural Adjustment Act apparently rested largely in the hands of the war gods hovering over the old world. The Tala-Ethiopian war and the tense European situation were being watched closely by the farmers.

The fact the United States already is importing Canadian wheat due to reduced domestic supply led to speculation whether the planters of the vast grain belt would consent to follow a new curtailment program. A.A.A. sign-up success would keep fully 600,000 acres in Kansas out of production, an area that normally yield 6,000,000 to 10,000,000 bushels annually.

The SNAPSHOT GUILD

SHADOW SHOOTING

Experiment a little with shadow effects. You'll enjoy it.

Did you ever snap shadow pictures? If you haven't you have missed a lot of fun and failed to get some grotesque but fascinating pictures to add interest to your snapshot collection.

Shadow pictures are easy to make. The main requisite is a good, strong sun in the late afternoon or early morning. Late afternoon, perhaps fifteen or twenty minutes before the sun starts gradually to disappear below the horizon, is preferable for your light is usually stronger at this time and casts deeper and sharper shadows.

The two pictures above are only a couple of examples of the many unusual pictures to be taken with the aid of a strong sun. The picture to the right was the result of an alert amateur's "nose for pictures." As he started down the steps of the elevated train platform with his always ready camera—says he, "Here is a picture," so hurriedly did the diaphragm at f11 and shutter speed at 1/25 of a second—and snap—he had a fine shadow picture. As the man at the bottom of the

steps was walking away from the camera a shutter-speed of 1/25 of a second was fast enough to stop action and still give the proper exposure.

Obviously the picture to the left is a shadow picture, but it shows further possibilities for taking unusual shadow pictures. An ideal place for taking shadow pictures is on light colored ground; the cement sidewalk, the street or better yet—on beaches where the light sand accentuates the dark body and outline of the shadow.

You can also get unusual shadow pictures by staging so that your shadow is cast on the side of a building or a house. Here's one thing to remember. If you take pictures with the shadow cast on a light colored surface the exposure should not be as long as that used in taking pictures with the shadows cast on a dark background. In other words you make your exposure for shadow pictures but little longer than you would for an ordinary snapshot with the same lighting conditions.

JOHN VAN GULDER

Experts Of League Give Advice On How To Cure Crisis In World Trade

Heat Wave Surrounds Earth

Startling Discovery Is Advanced By Scientist

The earth, is encircled by a vast belt of fiery furnace at least 1,000 degrees centigrade hot, the existence of which has hitherto been unknown to science.

The startling discovery is announced in the current issue of "Nature" by Professor E. V. Appleton, head physicist of King's College, London, and chairman of the British Radio Research Board.

The existence of the belt could never have been found in a sphere attempts for according to Professor Appleton it does not occur until between 150 and 200 miles from the surface of the earth.

The discovery has revealed that the atmosphere, instead of getting colder the farther one travels from the earth's surface, actually becomes hotter and hotter after the first seven miles.

This was deduced by sending experimental wireless waves into the atmosphere. Professor Appleton found that about 150 miles from the earth they were reflected back robbed of vital properties. He thought this was due to the waves striking a layer of intense heat and further experiments confirmed this belief.

The effect of the existence of this "furnace belt" is believed to constitute a serious obstacle in the use of microwaves (wireless waves under six metres) which it was hoped could be harnessed to travel round the world more cheaply and more efficiently than short and long waves used to-day. Short and long waves do not expand sufficiently into the atmosphere to touch the heat belt whereas microwaves do.

An example of this was described to me by Mr. F. O. Brown, principal of the Department of Scientific Research, who made a recent experiment in conjunction with Professor Appleton. Microwaves sent out from the east of London were traced to London three times on the way. Each time they return to earth, the waves were weaker in vital properties so that after reception at King's College, they were not strong enough to continue their journey.

Existence of the heat belt has also proved finally that man, with his present materials will never be able to construct a craft to fly or be shot towards the moon. No known machinery could function in heat of 1,000 degrees centigrade.

An International Highway

Motor Road Across Europe Would Promote Better Relations

The international touring conference in Budapest at the invitation of the Hungarian government was opened by M. Winchler, the Hungarian minister of commerce and communications. Nine countries, Belgium, Germany, Austria, Hungary, Yugoslavia, Rumania, Bulgaria, and Turkey, were represented by government delegates. These countries are particularly concerned in the discussion of questions connected with the building of the trans-continental motor highway from London to Constantinople. Besides these official delegates, 75 representatives of national touring and motoring clubs attended the conference. The League of Nations was represented by an observer.

M. Winchler emphasized the importance of the trans-continental highway in promoting economic intercourse and neighborly relations among the nations of Europe. Hungary, he said, had long recognized this, and had done her best, in spite of unfavorable financial conditions, to fulfill her own task of building the Hungarian part of the trans-continental road, which is now completed and will soon be opened to the public.

Prescription For Youth

Pastor Tells Of Some Ways To Keep Young

This prescription for keeping young was given at Auburn, N.Y., by the Rev. George E. Davies. Keep your eagerness for new experiences. Keep the confidence of youth. Never despair. Do not try to keep up with youth in your living habits.

Take to heart youth's ability to overlook petty annoyances. Make a life, not a living.

Just Slightly Injured

A cowpuncher ordered a steak at a restaurant. The waiter brought it in rare—very rare. The cowpuncher looked at it and demanded that it be returned to the kitchen and cooked. "It is cooked," snapped the waiter. "Cooked—nothing," replied the cowpuncher. "I've seen cows hurt worse than that and get well."

Ethiopia is exporting more coffee, hides and goatkins than at this time last year.

"Physician, heal thyself!" Well might that mocking cry epitomize the advice of economic experts of the league on how to cure the crisis in world trade, says a report from Geneva.

Everywhere doctors—individuals and governments—are at work. They are employing purely national remedies for the disease. "The doctors have not yet been able to agree," a report of the league's economic committee comments in tone of disappointment, "and it has so far been impossible to attack the disease in the proper way—i.e., internationally."

"Accordingly, the malady from which the world is now suffering is no longer entirely the crisis but rather the inability of the countries to co-ordinate their several efforts to emerge from the crisis. This inability to emerge from the crisis is a result of the paralysis of the international circulation, the regular operation of which is indispensable to the welfare of the civilized nations."

The sixteenth assembly of the league, representing 54 nations, gave its blessing to free international trade. The secretary of state for the United States sent a telegram of approval. Recovery of trade, the assembly resolution held, would be assisted by the conclusion by as many countries as possible, of bilateral agreements having for their object the application of a more liberal economic policy. The resolution held further that the beneficial effects would be more widespread when based on the principle of the most-favored-nation clause. Agricultural experts are, in addition, to be consulted with a view to finding a world solution for agricultural depression.

And documents submitted present a revealing picture of a world where doctors went wrong. Two facts emerge. The first is the steady and very substantial recovery in raw material production and industrial activity. The second is the almost complete stagnation of international trade.

Canada To Gulf Shelter Belt

125 Miles Of Planting Finished In Six Weeks

A start has been made on the great Canada-to-the-Gulf shelter belt about which so much was said and written a year ago, according to an announcement in the Forestry News Digest published by the American Tree Association, Washington, D.C.

Paul H. Roberts, acting director at Lincoln, Neb., says in the Digest that 125 miles of shelterbelt plantings have been completed in the six states traversed by the zone. An additional 5,117 acres of special tree plantings on 1,926 farms have been completed. This later planting was made in co-operation with farmers.

On the 849 acres of land now under lease for nursery purposes, seedling is being rapidly completed, and number of the species are up. Barring extreme weather conditions or unforeseen insect infestations, it is expected about 75,000 seedlings will be produced.

North Dakota, with 36 miles of strip plantings has the largest mileage. South Dakota with 28, and Kansas with 24, are close contenders. The mileage planted this year was very largely restricted by the amount of suitable nursery stock available, both as to age and variety of trees.

Wide climatic conditions encountered throughout the shelterbelt zone, make it necessary to grow a variety of trees to meet this range of conditions. Each state must plant to meet its own particular needs.

Legend Of Navajo Indians

Mothers-in-Law Are Reincarnated As Bears After Death

Mothers-in-law, says a Navajo Indian legend, are reincarnated as bears after they die. A 200-pound black bear became too troublesome, even for a mother-in-law, so M. E. Musgrave, director of the Mexican springs oil conservation project, shot it. Navajo squaws barred the doors of their hogans, sang hojini (good luck) songs and offered prayers to the bear's departed. The subject was who had touched the bear's carcass were put through a cleansing ceremony by a medicine man, who turned the departed spirit into a pine tree.

Not Caused By Quakes

Although ancient Rome had numerous earthquakes, there were never any of outstanding destruction. Some historians contend that many of the Roman palaces and temples said to have been destroyed by barbarians between the fifth and ninth centuries were really shaken down by quakes.

Sermon Was Appropriate

To avoid confusion when lights failed in the Central Baptist church at Saint John, N.B., during a hymn, Rev. Dr. B. D. Knott immediately began the sermon. The subject was the five foolish virgins who neglected to have their lamps filled with oil. The services ended in darkness.

QUIET WEDDING TAKES PLACE AT VIKING

A quiet wedding was solemnized on Thursday, October 31, 1935, at the manse in Viking, when Jean, third daughter of Mr. and Mrs. J. Macdonald of Woodstock, Alberta, was united in marriage to Mr. C. L. Brickman, of Viking, Alta., youngest son of the late Mr. and Mrs. E. A. Brickman.

Following the ceremony which was performed by the Rev. Stanley Scott, D.D., of Viking, Mr. and Mrs. Brickman left for Lacombe for a short honeymoon prior to taking up their residence at Viking where Mr. Brickman is engaged in farming.

Are you looking for fine all wool blankets in checks, plaids, colored borders or white. Call at the Lacombe Furniture Store and see the lovely new ones and you will be surprised how cheap they are.

SHOWING OF 100 CALVES

The Calf Club Show of the Dominion-wide Boys and Girls Farm Clubs at the Sherbrooke Winter Fair held recently was the largest assembly of its kind at a provincial exhibition. Two hundred and twelve Calf Club members from every district of the province of Quebec took part in the showing of 100 calves and yearlings and in the different judging contests for selecting teams to go to the Royal Winter Fair, Toronto.

M.D. BLINDMAN NO. 430 RESIDENTS TAKE NOTICE

It is imperative that those having stocks of seed grain or those requiring any for 1934 should report at once to the councillor for their division. Kindly call at the office and endorse cheques covering any work done by you this season.

W. A. Saunders, Sec. Treas. Nov. 7-14

A New Variety of Bromo Grass

(Experimental Farms Note)

A new variety of bromo grass has recently been developed by the Dominion Experimental Farms, and sufficient seed is now available for the making of extensive tests throughout the country. The new variety is now available for the making of extensive tests throughout the country. The new variety is now available for the making of extensive tests throughout the country.

Work was begun on developing the new strain by Dr. L. E. Kirk many years ago at the University of Saskatchewan, and since 1931 it has been continued by Mr. T. M. Stevenson, who is in charge of the Dominion Forage Crops Laboratory at the University of Saskatchewan. One of the chief objects was to develop a type of bromo grass which would be free from the objectionable spreading underground stems. The method adopted was to self-fertilize or inbreed a large number of individual plants each season and select in succeeding years from the progenies, those types with the non-creeping habit of growth.

Classified Advert. Rates

10 cents per count line, 40 cents minimum charge if paid in advance, 50 cents if charged. Cards of Thanks, In Memoriam notices \$1.00 per insertion not exceeding seven lines. Over that space 12 cents per count line. Headings count as two lines. In computing the number of lines, six words count to the line.

FOR SALE—One Carload of Feeder Steers and Heifers. A. Gilmore.

WHEAT CLEANING I have now in operation my Carter Disc Wheat Cleaner, capacity 150 bushels per hour, and am now prepared to do "custom" cleaning. Frank Bowtell, Phone No. 60, Nov. 7-14-21-28

FOR SALE—One Carload of Feeder Steers and Heifers. A. Gilmore.

CARD OF THANKS Mrs. William Sharp and Family wish to extend their thanks for the many kind expressions of sympathy shown, and for flowers sent during their recent bereavement.

We handle only 3-ply veneer suit cases and trunks. The suit cases are all covered with Duralite fibre which wears better than split leather. We have good prices on all styles. Lacombe Furniture Store. Adv.

our and seed production, and bromo grass proved no exception in this respect. One strain, however, was secured which retained all of its vigour of growth and which is an excellent seed producer. At the same time the plants do not possess the objectionable underground stems, and they are more dense and leafy. This strain, however, is not entirely free from the spreading habit. This has been found to be advantageous. Several strains were produced by breeding, which are entirely non-creeping, and invariably these were less productive.

Preliminary tests indicate that the new variety of bromo grass is likely to find its greatest adaptation in the Park Belt of the Prairie Provinces where, in combination with alfalfa, it is expected to excel as a hay and pasture crop. In Eastern Canada, also, where bromo grass is not grown at the present time, the new variety has given very good results, but further tests will be necessary in comparison with other grasses such as timothy and blue grass. Some of the main advantages seen for this variety in certain parts of Ontario are its drought resistance and especially its early habit of growth in the spring. Last year it was ready for grazing two or three weeks earlier than timothy or blue grass.

The new variety of bromo grass will be called "Parkland", indicative of its adaptation to the Park Belt of the Prairie Provinces. Seed will be available for general distribution this year.

TO ORGANIZE STUDY GROUPS

With a view to organizing several study groups for the purpose of taking up nutrition, proper cooking of foods, etc., Mrs. W. Teward, Mrs. J. Craigie and Mrs. W. Newton were appointed to approach the leaders of the women's organizations of the various churches, and arrange a meeting at which the matter may be thoroughly discussed. The above action, taken by the Women's Institute at their regular meeting on Nov. 2, at Mrs. H. Howe's home, is in response to a request by Miss Isabelle Alexander of the Women's Bureau, who is anxious to establish several groups who will make an intensive study of foods. The course included six lessons, which will be given one each month for six months.

Because of the absence of many of the members it was decided to hold the Surprise box until the December meeting.

Mrs. R. Millard reported very satisfactory results from the Halloween Frolic. The lucky ticket was drawn by Miss Jean McLean.

Election of officers will be the main item on the program of the December meeting which is to be held at the home of Mrs. C. E. Todd on the first Saturday of the month.

WANT MORE LAMBS FOR EAST Many of the farmers of Eastern Canada who fed Western lambs during the 1934-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada.

The Annual Armistice Dance will be held on Friday, November 15 in the Adelphi hotel. Proceeds to go toward the upkeep of the Memorial Park. Good music and refreshments. Admission 50 cents. Adv.

AUTO PISTONS WEAR OUT

A newly developed process known as "Anodic" coating is employed to give the new Plymouth aluminum pistons a diamond-like surface hardness. "Anodic" coating consists of the electrolytic treatment of the piston in a chemical bath. The process is said to make the pistons virtually immune to wear.

GOOD SEED IMPORTANT

To drive home to farmers in general the important place of good seed in an agricultural programme requires that a continuous, persistent, sound, educational programme be carried on over a period of years, said Professor Robert Sumner of MacDonald College in his presidential address to the Canadian Seed Growers' Association.
